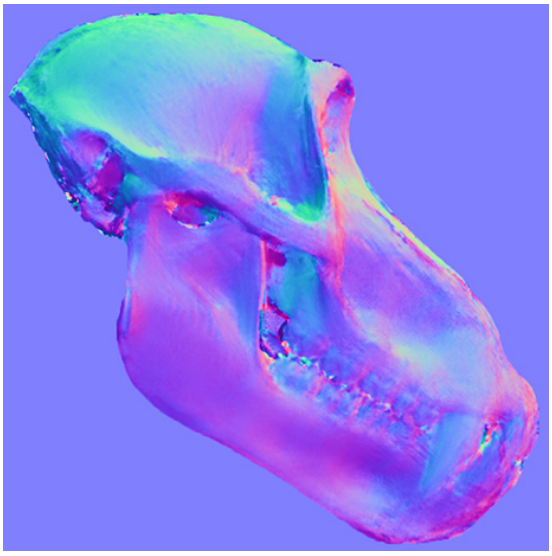
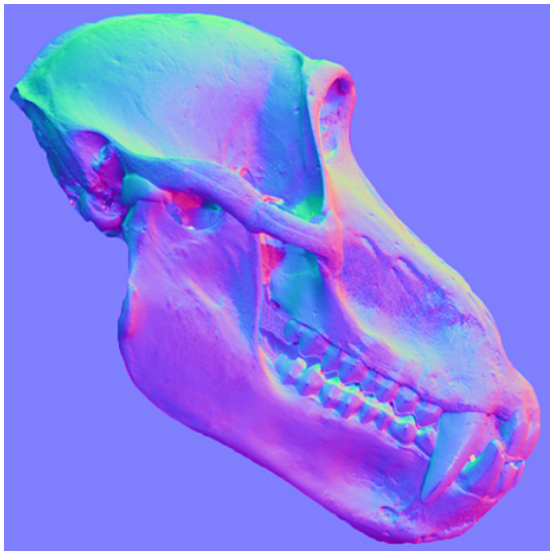
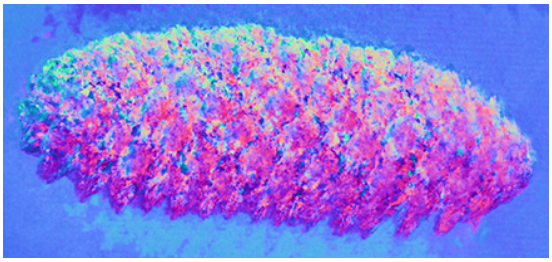
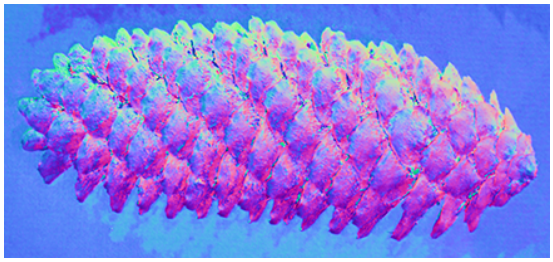
Table 1: *Normal Maps for different dataset, the left column is before the alignment and the right column is after the alignment.*

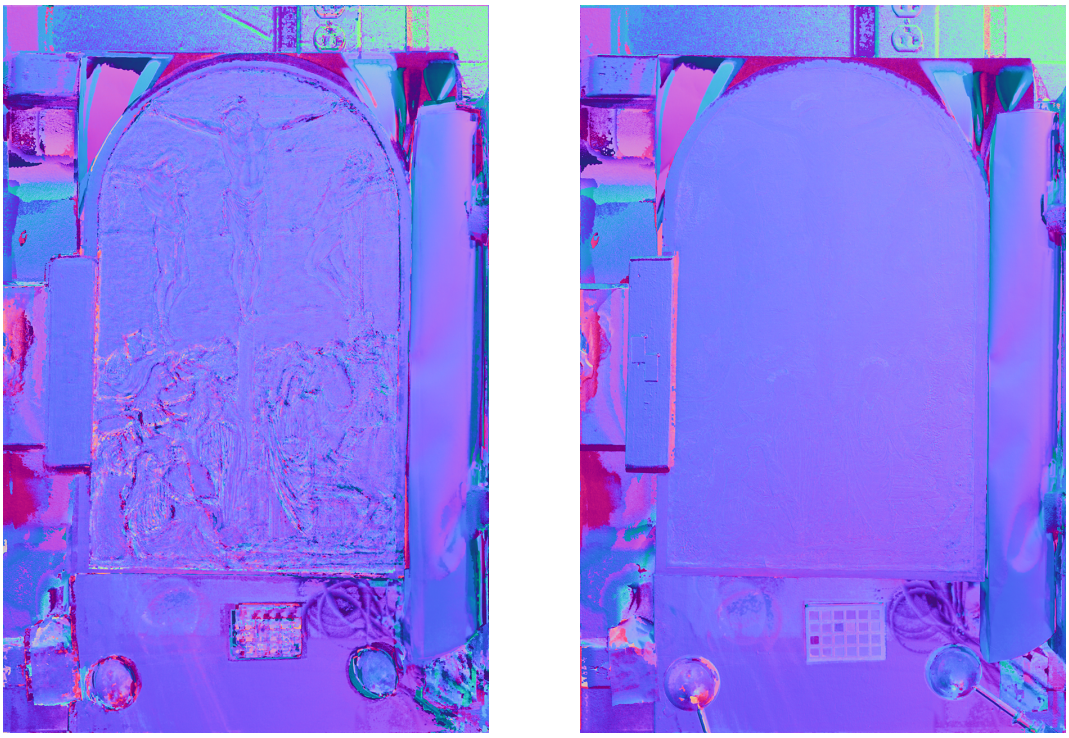
Normal Maps Before Alignment	**Normal Maps After Alignment**
Following datasets have been manipulated randomly to generate misaligned datasets.	
		



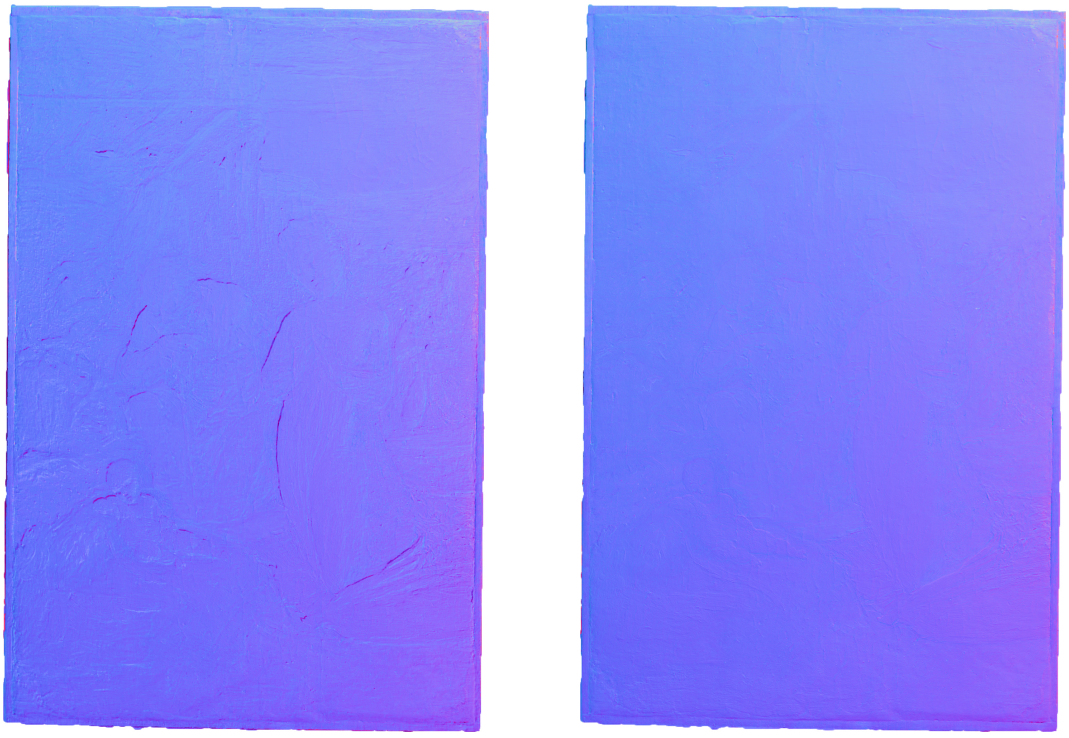


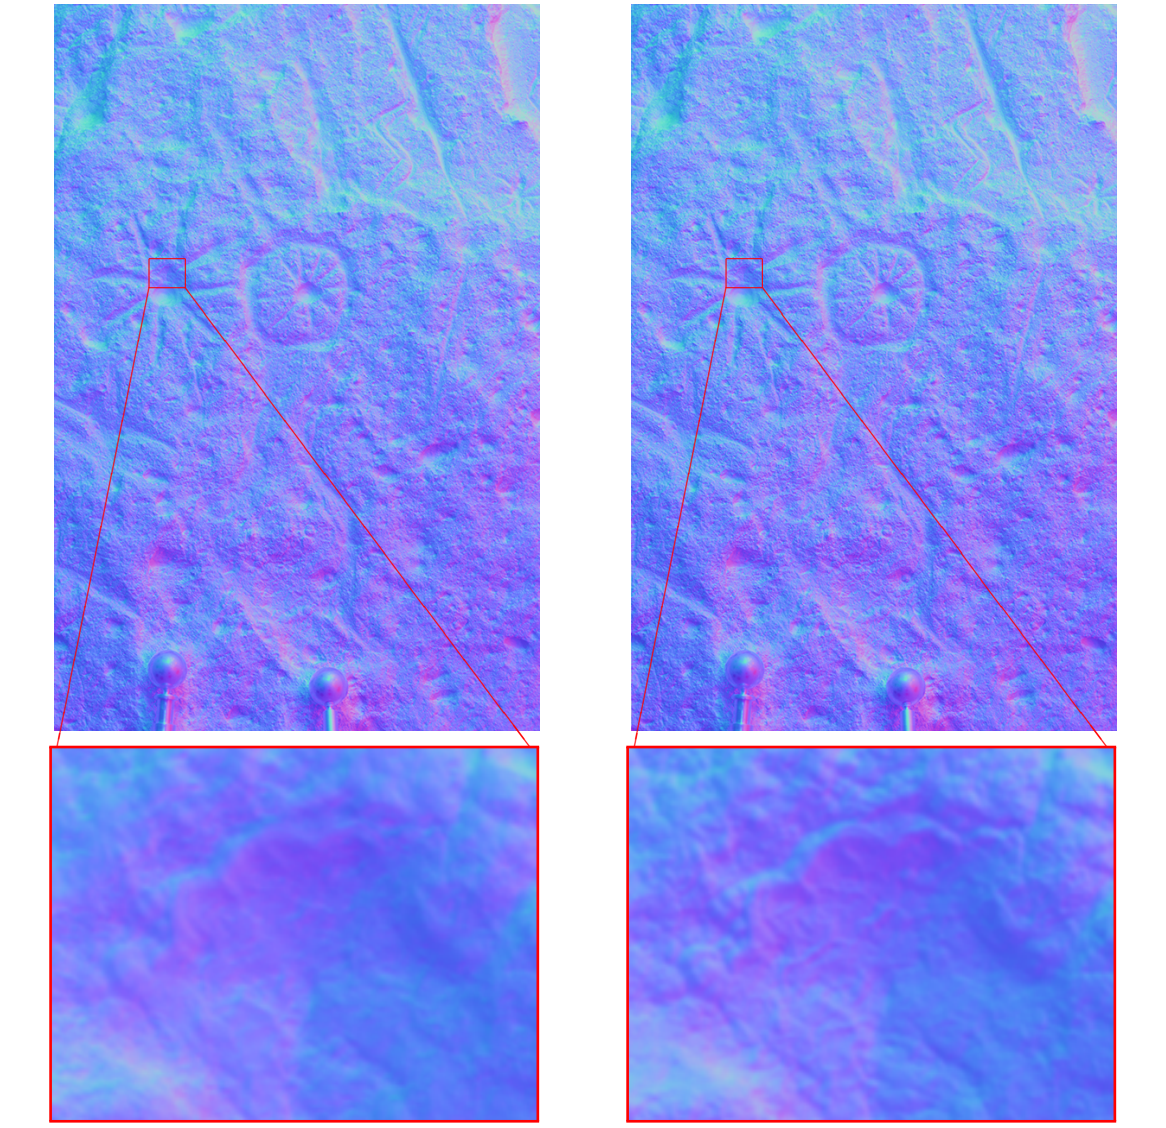






Following datasets have misalignments originally.





Note: Also animated GIF files are provided in the additional files. "∗_before_alignment.gif" shows the misalignment between two random images in the dataset, and "∗_after_alignment.gif" shows the aligned versions of the same images.
